The Problem with Plastics: Virtual Presentation

Presented by Jill Bartolotta, Extension Educator for the Ohio Sea Grant College Program

Aug. 13; 6pm-7pm

\$5 suggested donation

Plastic is the most common item found on cleanups with most of these plastics being single-use of disposable plastics. We must stop plastic at its source and use less of it. Plastic is harmful to the natural environment and all living organisms. We need to rethink how we use plastic and ultimately make the decision to use less in our lives.
